CAREER OBJECTIVE

Dedicated Electronics and Communication Engineering student with strong programming skills in C, Java and Python. Experienced in Arduino-based system development and proficient in Java. Demonstrates excellent leadership, problem-solving, and teamwork abilities with a passion for innovation and continuous learning.

EDUCATION

HSC , Sri Aurobindo Mira Universal Madurai 70%	2022 – 2023 Madurai
SSLC , Vikaasa School Heritage Campus Madurai 85%	2020 – 2021 Madurai
Graduation , Rathinam Technical Campus Coimbatore 8.0	2023 – Pursuing Coimbatore

SKILLS

Programming Languages

C, JAVA, PYTHON

Database Systems

MySQL, PostgreSQL

Developer Tools

VS Code, PyCharm, Eclipse, IntelliJ IDEA, Figma.

PROJECTS

Smart Banking Management SystemTools: [React.js, Spring Boot, Spring Security, PostgreSQL, REST API]

- Developed a full-stack banking web application to manage user accounts and transactions.
- Implemented core features including deposit, withdrawal, and fund transfer between users.
- Ensured data consistency using transactional management during financial operations.
- Integrated secure login with encrypted passwords for user authentication.
- Maintained transaction history with detailed records for each operation

Travel Booking Application | Tools: React.js, Spring Boot, MySQL, REST API

- Developed a full-stack travel booking web application for users to explore and plan trips.
- Implemented features such as destination browsing, trip package management, and booking functionality.
- Designed and integrated RESTful APIs between the React frontend and Spring Boot backend.
- Developed secure user authentication and authorization for customer account management.
- Managed travel package and booking data using MySQL with efficient database operations.
- Built a responsive and user-friendly interface to provide a seamless travel planning experience.

Taxi Management System, Java (System Design)

- Developed a Taxi Management System in Java using low-level design principles and OOP concepts, built and tested in IntelliJ IDEA.
- Implemented core modules like driver management, ride booking, taxi allocation and fare calculation using Collections (ArrayList, HashMap).
- Added smart booking logic for nearest taxi assignment and improved system reliability with input validation, error handling, and test cases.

CERTIFICATION

- NPTEL – Programming in Java (IIT Kharagpur) | Elite + Gold Certification | 90% Score
- Coursera – Innovation and Design Thinking
- Hackathon Participation – Hack the Horizon-24 hosted by KPR College of Engineering

KEY STRENGTHS

- ~Leadership and Management
- ~Logical Thinking
- ~Problem Solving Ability
- ~Team Collaboration and Adaptability
- ~ Effective Communication & Presentation
