SUMMARY

Motivated Computer Science Engineering student with knowledge of Python, Java, SQL, Machine Learning, and Web Development. Passionate about problem-solving, software development, and building scalable applications. Eager to apply technical skills and contribute to innovative projects while continuously learning and growing in a professional environment.

EDUCATION

Secondary School Leaving Certificate, IVL Matric Higher Secondary School.
percentage=100

06/2020 – 04/2021
Dharmapuri, TamilNadu

Higher Secondary School, IVL Matric Higher Secondary School

06/2022 – 04/2023
Dharmapuri, Tamil Nadu

Biology-Mathematics Stream Achieved 87% in final board examinations

B.E Computer Science and Engineering,
Rathinam Technical Campus

present | Coimbatore, Tamil Nadu

Learned core computer science concepts including Data Structures, Algorithms, and Database Management Systems, CGPA-8.20.

INTERNSHIP

Web Development & AI Intern — Internboot

09/2025 – 10/2025

- Worked on web development tasks including backend integration, debugging, and application optimization using Python, Java, and SQL while integrating basic AI/ML functionalities such as data-driven logic and model-assisted features.
- Collaborated in application testing, issue resolution, and Agile-based development workflows using GitHub version control, contributing to AI-enhanced feature improvements and system optimization.

PROJECTS

AI-Powered Adaptive Interview Preparation & Skill Gap Analyzer

- Developed a full-stack web application to analyze resumes, identify skill gaps, and generate personalized interview questions.
- Built REST APIs using Spring Boot and integrated MySQL for secure data management.
- Implemented AI-based resume analysis and recommendation features to provide targeted learning paths and interview preparation guidance.
- Designed an interactive dashboard for tracking interview performance and skill improvement.

Biological Traits Clustering

- Built an unsupervised machine learning model using K-Means clustering to analyze and group biological traits based on similarity patterns.
- Conducted data cleaning, preprocessing, and visualization to uncover meaningful relationships within the dataset.
- Utilized Python, Pandas, NumPy, and Matplotlib for data analysis and cluster visualization.

SKILLS

Programming Languages Python, Java, SQL, C	Libraries & Frameworks NumPy, Pandas, Scikit-learn, TensorFlow, Matplotlib	Tools and Platforms Git, GitHub, Streamlit, Google Colab, Power BI, AWS Cloud Platforms	Machine Learning Supervised Learning, Unsupervised Learning, Neural Networks, CNN, Transfer Learning, Model Evaluation
Soft Skills Analytical Thinking, Problem-Solving, Team Collaboration, Effective Communication, Adaptability			

CERTIFICATES

- AWS Machine Learning Foundations
- AWS NLP Fundamentals
- DataCamp Intermediate Python
- MongoDB Database Fundamentals

LANGUAGES

- English
- Tamil
